AXEL ZEBE
Fresh Graduate

I'm a fresh graduate from BINUS University, majored in Computer Science. I have some hands-on experience, having worked before as an intern. I've been involved in both Back-End and Front-End sides of development. Having worked on both sides before, I'm keen on getting any Back-End, Front-End or Full Stack position, but not limited to those positions, since I'm a curious person by nature and willing to spend a lot of times learning something new. And lastly, I'm a firm believer that good communication is the key to success in every aspect of life.
